Subject: Request for Extension

Kristine,

I understand that lawyers for EPA and the LWG discussed EPA's reasons for not accepting our proposed alternative language below during their conference call this afternoon. Now that we understand it better, we would like some additional time to attempt to resolve this matter. Therefore, we are requesting a one-week extension to the deadline for initiating dispute on EPA's original January 8, 2016 direction concerning the RI Title Page. Please let us know by noon tomorrow whether EPA will allow this extension. We would also appreciate EPA confirmation that, if EPA does not allow the extension, we can submit any request for dispute resolution by email, rather than by certified mail.

I understand that Patty will be sending a compromise proposal to Lori shortly. Also, please note that we are not requesting an extension of time to produce the final RI Report.

Thank you,

Bob
